Dear Parent/Carer,

Vulnerable Student

I am writing to you as we have a student in the Academy who is immunocompromised and is at risk of becoming seriously unwell if they come into contact with infections such as measles, chicken pox, slap cheek or shingles. If your child develops any of these infections please inform the Academy immediately by ringing the absence line so we can put measures in place to protect the vulnerable student. We can also support with signposting you to advice on how to support your child should they develop any of these illnesses.

We are taking measures to protect this student whilst in school. Our PSHE curriculum for all years includes awareness around personal hygiene, however, we will also be reminding all students to be mindful of personal hygiene when using the toilet and before meals and would ask you to remind your child of the importance of cleanliness.

Thank you for your support.

Yours sincerely,

Mrs E Wheller
Associate Principal
