Dear Parent/Carer,

Personal Hygiene

Unfortunately, we have received reports of head lice in the school.

We would therefore be grateful if you would examine your child's hair very carefully for the next few days, and also that of other family members. It is important to comb hair daily for several days after an infection has been treated.

Your help with this is essential because, if even one child with head lice does not receive prompt and appropriate treatment, re-infection of other children will continue. It can become quite costly for families to repeatedly purchase the appropriate medication so your co-operation in this matter is much appreciated. It is beneficial if long hair is tied up.

If you need any support with this please contact your child's Head of Year.

We thank you for your support in this matter.

Yours sincerely,

Mrs E Wheller
Associate Principal
